Frontend Developer

PROJECTS

Instagram Clone @ Frontend

APR 2024 - PRESENT

- This project is developed as an application that mimics the core functionality of Instagram.
- It is built using React and incorporates responsive design principles to provide a user-friendly interface.
- The project utilizes the Slick Slider plugin to allow users to smoothly navigate through posts. This ensures a seamless scrolling experience on both desktop and mobile devices.

YouTube Clone @ Frontend

JAN 2023 - PRESENT

- This project is a clone of YouTube, developed using JavaScript, HTML, and CSS.
- It replicates the core functionalities of YouTube, providing a platform for users to watch and search for videos.
- The application is built with responsive design principles to ensure it works seamlessly on both desktop and mobile devices.

Play X 3D Design @ Frontend

JAN 2023 - PRESENT

- This project showcases a unique and modern user interface (UI) design with three-dimensional.
- (3D) elements, developed using HTML, CSS, and JavaScript.
- The primary objective of this project is to create an engaging and visually appealing user experience by incorporating 3D design principles.
